

Sunseeker Energy and Nations Roof plan to establish a manufacturing centre

Schindellegi (Switzerland), 16. July 2009 – The solar energy company Sunseeker Energy Holding AG has entered into an expanded Memorandum of Understanding with its new strategic partner Nations Roof LLC. Further to their initial plan to cooperate on distribution and installation of Sunseeker solar units, the two parties plan to establish a manufacturing centre located in the USA. The Sunseeker Energy : Nations Roof partnership gives Sunseeker access to the US commercial and industrial solar market, working with a well established and highly respected partner, with an extensive national network.

Sunseeker Energy has developed a new concentrated solar energy unit that substantially reduces the active solar panel area and costs per megawatt. Nations Roof is America's 11th largest roofing solutions supplier and is highly experienced in providing environmentally sustainable roofing solutions and solar installations to its extensive national client base.

“With 18 branches and 600 employees Nations Roof is the ideal partner for Sunseeker Energy's USA program. The two companies have significant and complementary expertise, resources and leadership platforms that can be used to maximise the project outcomes,” Antony Howard, one of the founders and Director of Sunseeker Energy Holding AG, says. “The Joint Venture with Nations Roof to build a manufacturing centre will allow us to compete at the forefront of the American solar energy market.”

About Nations Roof LLC

Nations Roof was founded to give today's businesses a clear choice for trustworthy, cost-effective roofing. Nations Roof is the only top roofing contractor in the United States that delivers customers the unique combination of locally based installers and the strength and resources of a national company.
